ACCESS CONTROLS

SOLUTIONS FOR OFFICES, HOTELS,
EQUIPMENTS, HOMES...

TRIVEL RENEWS ITS SOLUTIONS OF ACCESS CONTROLS AND SECURITY
New designs which unify three different technologies in the same mechanism, making easier the installation, with a unique aesthetics in the space.
The new Access range incorporates the latest technology in all its models: Bluetooth (Opening from your smartphone), Anti-vandalic IK08, Retro illumination, watertight and dust-tight.

TRIVEL expands its catalogue with new models and solutions in security controls (ACCESO), to satisfy the requirements and needs of the current market, **and make front to the new challenges of the future.**

TRIVEL offers access controls referents in quality, with a wide catalogue of last generation systems, whatever in glass or other materials. Thanks to this, TRIVEL offers the maximum customisation to its customers on its range of access controls, including the last technology of the security system to its products, for doors and entrances in offices, companies and particular homes, with a wide range of colours and finishes (metallics, chromed, matts...)

Controls of access with the latest technology, maximum security, easy to use and with the guarantee of TRIVEL

New models of access control systems with any management of access authorizations, card readers, numerical keyboard, fingerprint reader and multiple functions.

These systems are designed for internal and external installations, which thanks to TRIVEL, remain completely integrated on flat glass doors and panels, walls and any other space, with a clean and non-invasive design.

## TRIVEL RENEWS ITS SOLUTIONS OF ACCESS CONTROLS AND SECURITY

Mechatronic cylinder

The TRIVEL'S mechatronic cylinder can be installed in any door as an electronic system of access control. Just some minutes are needed to substitute a mechanical cylinder by the mechatronic cylinder TRIVEL, without any wiring.
It can be installed in any TRIVEL lock, and allows to make authorised access modifications, creating unlimited time accesses and making a personal monitoring of the operations.

Features

• Big ease of using and programming.

• Intelligent cylinder, without need of management software.

• Possibility to add or eliminate users' credentials through programming cards.

• User's credential physical presence is not needed to manage its grant or withdraw from the system.

• Huge range of models and dimensions for different kinds of doors.
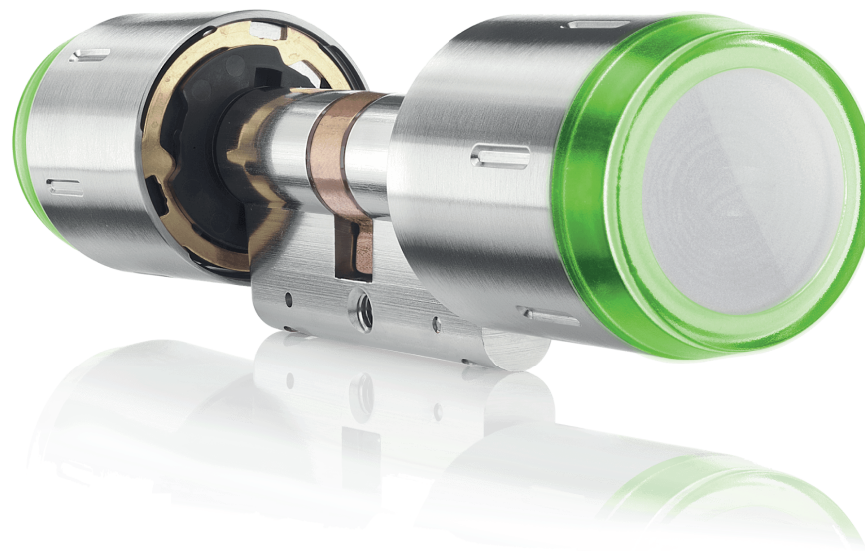

ACCESS CONTROLS WITH MECHATRONIC CYLINDER

TRIVEL®
EXPERIENCE MAKES US BETTER

The TRIVEL's mechatronic cylinder can be managed through the TAPKEY app, it is very easy to use with the smartphone as well as from the TAPKEY transponder, for a more traditional management.

App Tapkey

The Tapkey app allows to manage the access, create and authorise users to open the doors with the Tapkey transponder or with the app, from anywhere in a quick and easy manner.

PROGRAMA

ACCESO

Wireless via cloud (3G / 4G / LTE)

App Tapkey

NFC

Transponder

Transponder Tapkey
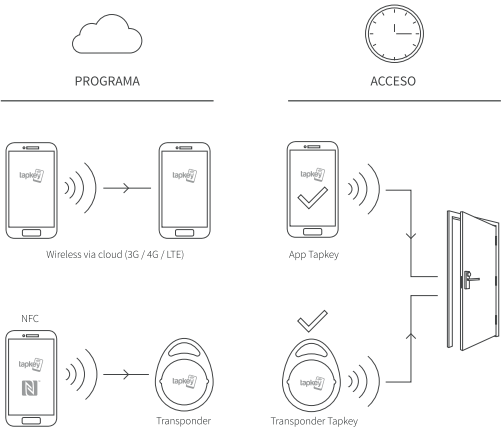

Transponder Tapkey

The Tapkey Transponder is complemented with a keychain and is an excellent choice for everyone who prefer a more traditional way of access
The administrator only has to program the Transponder with an enabled NFC device (Near Field Communication)
