MORE THAN 75 YEARS OF EXPERIENCE

The fittings, accessories and TRIVEL systems are recognized as the maximum guarantee and reliability to execute projects with glass. Holding, supporting, ensuring glass panels and moving heavy doors is the specialty of INDUSTRIAS GALTÉS, S.A.

From our 4.000m² facilities in Castellbisbal (Barcelona), we keep growing, evolving, researching and improving to offer high quality products with the commitment and service that characterizes us.

Presents over the world with the confidence of the main industrials, architects and interior designers.

VALUE OF ORIGIN
Maximum reliability, quality and durability

OUR STAR PRODUCT: HIDROBI MARK III, NOW WITH HIDDEN SCREWS

ADJUSTABLE HIDROBI MARK III WITH HIDDEN SCREWS

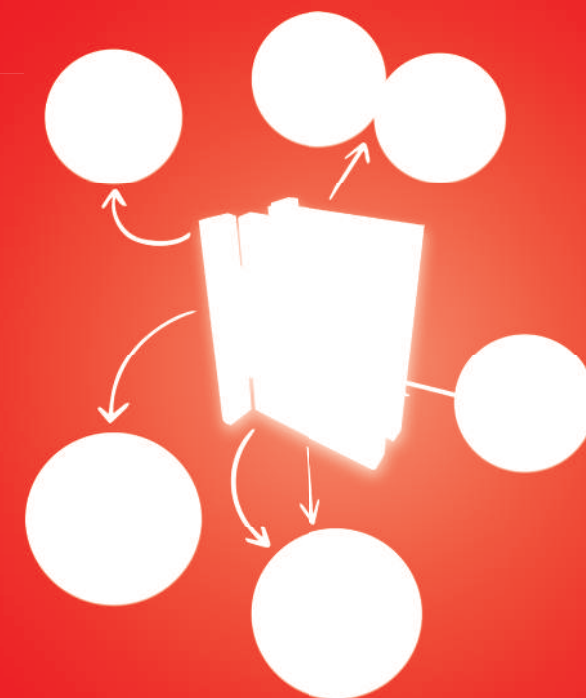

TRIVEL presents its recognized HIDROBI MARK III hydraulic hinge, apt for spas, saunas, and saline environments, with a new redesign that improves the watertightness and easiness of installation, and with a new aesthetic, as the new hydraulic hinge has been designed with trim covers, both in the wall base as in the front part.

FEATURES

- Standard and special finishes
- Alignable
- 0° point adjustment
- GRADE 5 certified, for spas and saline environments, ensuring a better glass tightening.

THE NEW HIDROBI MARK III HINGE STANDS OUT FOR ITS NEW DESIGN AND REDEFINED BENEFITS:

Covers manufactured in AISI 316 stainless-steel.
Redesign of the hydraulic system, doing more effective the closing speed regulation.
Closing position alignment with new tightening system.
More power and fixation of the glass tightening (4 tightening points)
Coliso drills in the fixation base to wall or frame, absorbing possible deviations of the drills done during the installation
New “H” design of the fixation base, ensuring a perfect fixation and reducing the clearance between door and wall or frame
(Allows to reduce the franchise to just ± 4 mm).

“Adding some covers is not just an evolution... The new HIDROBI hinge has been restated from 0, improving the complete design, with bigger watertightness of the installation and bigger benefits, durability, and reliability.”

HINGES - HYDRAULIC PATCHES - FLOOR SPRINGS - FITTINGS - GASKETS FOR SHOWER BOX - ANTIPANIC SYSTEMS - LOCKS
STRIKE BOXES - ACCESS CONTROLS - HANDLES - DOOR RAILS - KNOBS - CANOPIES - SUPPORTS FOR SCREENS - ACCESSORIES

COSMO & CRONO COLLECTION

COSMO & CRONO

LOCKS WITH REVERSIBLE AND INTERCHANEABLE HANDLES 100% CUSTOMISED FOR GLASS DOORS.

This ingenious and novel system, which has been patented, is born to answer the continuous need of the current demands in the architecture and interior design, presenting a lock with a modern and minimalist handle, 100% customizable, with attractive and actual metallic colours.

¿Locks with reversible and interchangeable handles?

As simple like this. TRIVEL offers you the possibility to change the aesthetics of the lock in a few seconds. The handle is substituted just loosening the screw sited in the lower part. In a few seconds, the aesthetics of the door changes completely, having the option to combine different colours on each side, as in addition, the handle is reversible.

BASTET,

THE NEW LOCK WITH INTERCHANGEABLE HANDLES COSMO AND CRONO

BASTET presents a design of straight lines and minimally invasive, with trim covers in AISI316 stainless steel, and reversible handles CRONO (straight handle and triangular core) and COSMO (Oval handle with soft shapes). Both handles are available in a wide range of metallic colours.

A successful combination of the lock in bright or satin stainless-steel finish, with the COSMO or CRONO handle in vivid metallic colours.

GRADE 5 CERTIFIED, for saline environments. The new lock has been designed for spaces with corrosive environments, with GRADE 5 certification.

MAGNET

NEW FAMILY OF MAGNETIC LOCKS AND COUNTER STRIKES

The closing magnetic system offers a bigger comfort and security, as it guarantees that the door remains completely closed.

MAGNET are locks and counter strikes with a minimalist design, with marked geometries that include the design of the COSMO/CRONO handles (patented* by TRIVEL).

Manufactured in aluminium with hidden tight systems. Standard finishes: Satin Stainless-Steel Anodized- Matt Black Anodized. Finishes of the handles: Possibility to combine finishes.

SPECIALITIES

BEND

HINGES SIMPLE AND DOUBLE
FOR CURVED GLASS

TRIVEL presents its first hinge for curved glass
BEND Simple and **BEND Double** are the two new references
that open a new era in fittings for curved glass for the historic Spanish brand.

TRIVEL launches its first hinge for curved glass, as a big bet to cover any need of the market. TRIVEL counts with more than 75 years of proven track record in the sector, always with fittings for flat glass.

BEND, which is the reference of the new hinges for curved glass, inherits all the experience of TRIVEL in the design and manufacturing of adjustable alignment hinges. An elegant and articulated hinge that allows to absorb minimum radii of curvature of 800mm and a practical adjustable alignment (closing 0° point adjustment) to guarantee a perfect installation of the door with both plain or curved glass fix laterals.

MILETO

MAGNETIC SUCTION PAD KIT
FOR GLASS DOOR

We present the new electromagnetic lock **MILETO**
in our catalogue of novelties 2024.

MILETO increases the range of locks with this new series of electromagnetic locks, that can be installed with our last generation ACCESS controls, available in different options: keyboard, card, fingerprint, or facial recognition.

MORE SECURITY
MORE COMFORT
MORE CONNECTIVITY

BAR 369

PIVOTING ADJUSTABLE HINGE

**New BAR369 hinge with adjustable alignment,
for glass screens with pivoting doors.**

We keep increasing our BAR family to reply to all your designs in shower boxes and bathrooms.

CERTIFIED QUALITY

The new BAR hinge is manufactured in stainless steel AISI 316, with screws in stainless steel A2, bearing.
pivots and blocking springs in AISI 420 and AISI 302,
and glass clamping points in PE material.

The adjustable hinges are designed and manufactured entirely by TRIVEL, and it's certified according to the Standard.
UNE-EN 1935:2002/AC:2004, grade 7: 200.000 cycles, by the Standard.
UNE-EN 1670:2007/AC:2008 Grade 5, maximum resistance to the corrosion.
